

SpinDLP

Data Leak Prevention and Data Loss Protection for M365 and Google Workspace

SpinDLP helps organizations to safeguard their sensitive SaaS data from accidental or intentional loss or leak, reduce security incidents, and improve compliance by monitoring unauthorized access to business critical SaaS data and recovering lost data in a matter of minutes vs months with integrated, automated SaaS backup and fast incident response.

Challenge

74% of breaches involved the human element: including social engineering attacks, errors, or misuse, according to Verizon's 2023 Data Breach Investigation.

Lack of visibility and fast incident response lead to Security, Compliance and Data Loss risks, including:

- Lack of visibility on granting API access to a malicious User or unsanctioned 3rd-party App or browser extension.
- Lack of visibility on SaaS data abnormal sharing, transfer, or downloads
- Lack of visibility on SaaS data abnormal deletion

Protect your organization from the risk of:

Insider Threats

Granting access to a malicious user or unsanctioned app may result in data leak and non-compliance

Data Loss

Employees or Apps can easily share outside or delete sensitive SaaS data accidentally or on purpose

Non-Compliance

GDPR, PCI, and other compliance require secure sensitive data backups

Key Capabilities

24/7 Cloud Monitoring

Real-time monitoring of your Google Workspace or Microsoft 365 environment on data being shared outside of your company, data classification, abnormal data transfer, download, deletion, unsanctioned OAuth access granted, brute force attacks, and GEO IP login.

Security Automation & Integrations

Get immediate, customizable notifications on detected incidents, misconfigurations, and risk score changes from a single dashboard that includes advanced reporting and integrations with Splunk, ServiceNow, Jira, and Slack.

Compliance-Friendly SaaS Backup

3x a day cloud-to-cloud backup to secure cloud storage at 32 locations around the world to meet compliance and local regulations.

Low False Positive

Reduce up to 95% of your security incidents in a matter of hours or days instead of weeks or months.

Data Leak Prevention

Identify malicious users or unsanctioned apps that have unauthorized access to your SaaS data in a matter of minutes to protect the company against data leak disasters or security breaches.

Alerting & Reporting

Immediate, customizable notifications on detected security incidents from a single dashboard that includes advanced reporting and API integrations with Splunk, ServiceNow, DataDog, Jira, Teams, and Slack.

Customer Use Cases

GURNICK ACADEMY

Gurnick Academy of Medical Arts Proactively Protects Sensitive Student Information

With 3,000+ students and 500+ employees using Google Workspace, Gurnick Academy of Medical Arts needed to securely and reliably backup potentially sensitive personal student and lecturer data stored on Google Drive.

With SpinOne's fully automated 3x Incremental Snapshot Daily Backups, they have a scalable, compliant DLP solution as well as disaster recovery capability to protect against any potential data loss.

"SpinOne has been a game changer from day one. We were drawn to Spin.AI's platform because it was so easy to set up and manage. With SpinOne, we have full transparency into what's happening in the environment and can enforce policies that are stronger than ever before."
