

Top University Secures SaaS Operations with SpinOne

OVERVIEW

As one of the largest public universities in the world, this institution provides service to over 150,000 students, faculty and alumni. With a broad range of master's and bachelor's degree programs, nearly 20% of the student body is made up of international students. The university has a strong reputation in business subjects, in particular Economics, for which it is regularly ranked amongst the top 50 institutions worldwide. It is known for its high academic demand to degree students.

SpinOne provides us the tranquility we need to keep on working with Drive, so we are very satisfied

Manager of Computing and Communications Service

THE CHALLENGE

This organization is one Google's largest Google Workspace accounts by users deployed and as such has unique challenges. With over 150,000 users it must seamlessly manage synchronization of thousands of different user permissions, a wide exposure to data loss and data theft and as a public institution is a notable target for ransomware. The IT team required a simple to use product that could scale across the vast amount of user accounts, handle data loss protection in bulk and provide ransomware detection and restore of any stolen or encrypted data.

THE SPINONE SOLUTION

The IT team trialed numerous products. All other competitive solutions were unable to manage the sheer volume of data while others were unable to accurately sync permissions to users accounts. Only SpinOne was able to meet all the requirements of the University.
