SaaS Security Challenges

SpinOne Platform

2023 Roadmap

Why Spin.AI?

Challenge #1: Ransomware issue

Without SpinOne

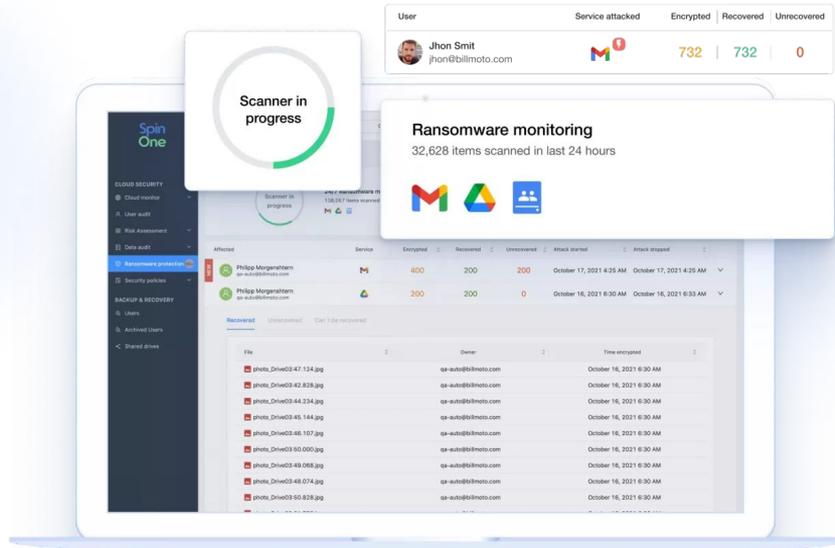

1 Month
Downtime

With SpinOne

<2 Hours
Downtime

Reduce Downtime
Reduce Recovery Costs

SpinOne SaaS Ransomware Detection & Response

- **2 Hour Incident Response SLA**
- **24/7 Ransomware Monitoring**
- Behavior-based Anomaly Detection
- Identify a malicious source of the attack
- Stop an in-progress ransomware attack
- Prevent further encryption
- Remediation
- **Fast recovery** of the encrypted data only, that **takes minutes, instead of weeks**

Challenge #2: SaaS & Data Security Posture Management

Without SpinOne

Months

- Low visibility
- Manual processes
- Long deployment
- Delays between alerts
- No Incident Response

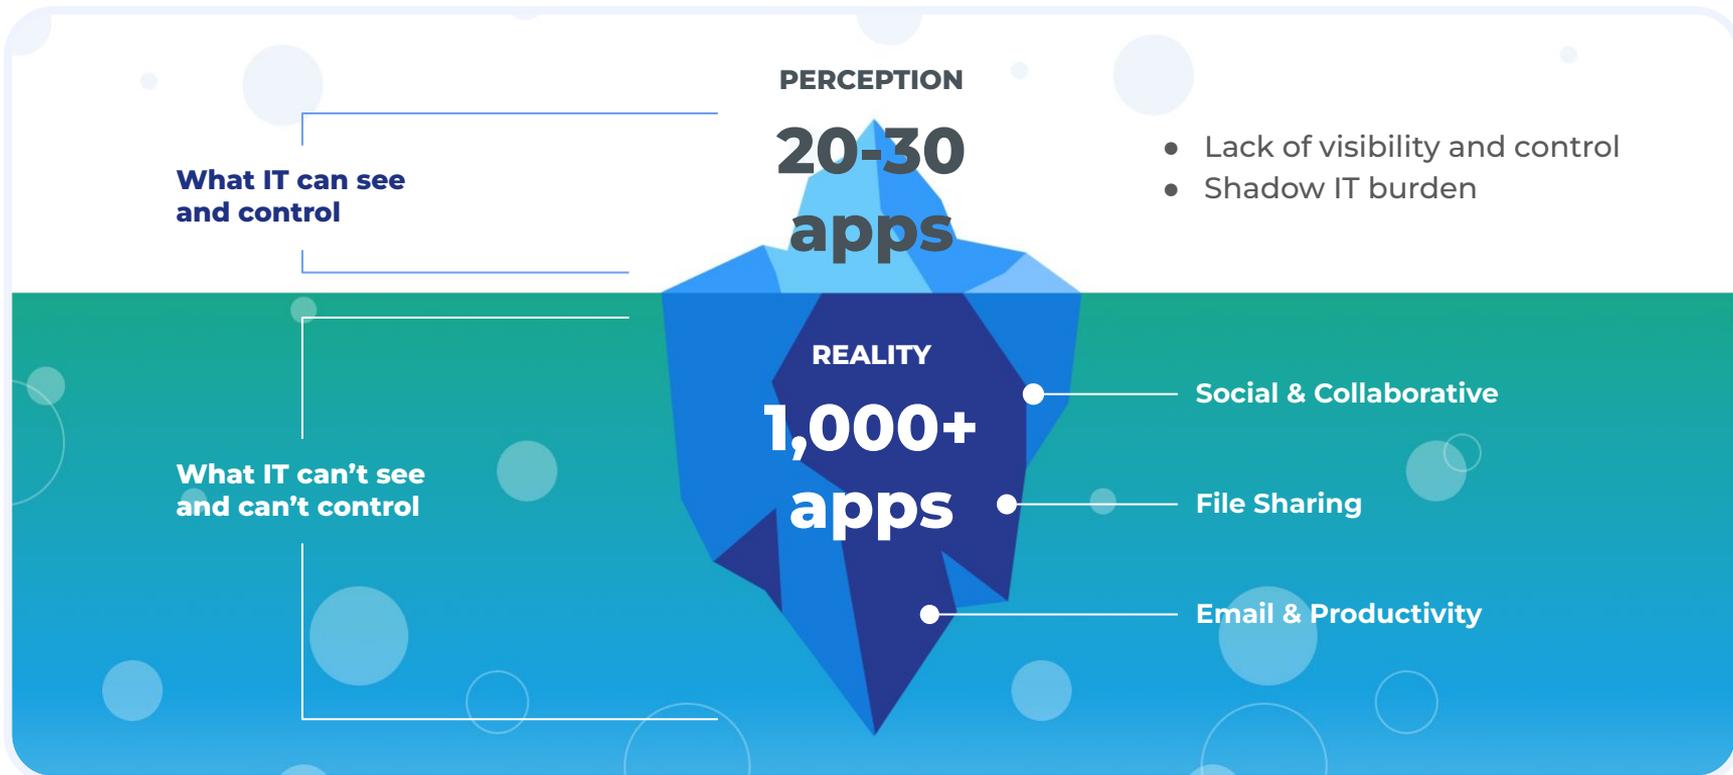

With SpinOne

Minutes

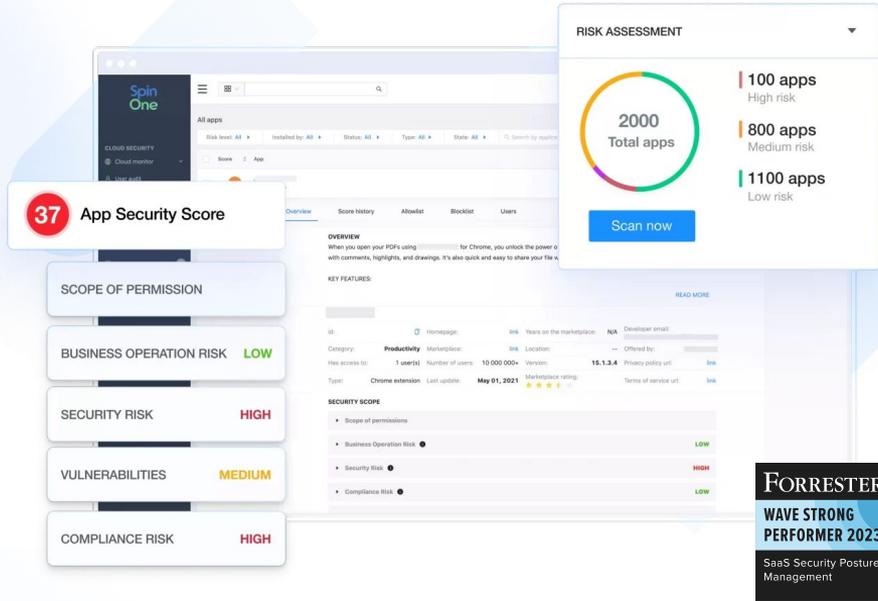

- Full Visibility
- Automation
- Fast deployment
- Real-Time Security Alerts
- Fast Incident Response

Reduce Risk
Save time
Reduce Security Issues

The Source of the Problem: Lack of Visibility

SpinOne SaaS Security Posture Management

- Shadow IT Discovery: **300,000+ apps & extensions** assessed by our AI-algorithms
- **Automated Risk Assessment**
- Continuous Risk Reassessment
- Risk History
- **Granular Security Policies**
- Fast Incident Response
- Approval Process
- **Advanced Reporting**
- Integration with 3rd-party: Splunk, ServiceNow, Jira, Slack, DataDog.

Challenge #3: SaaS DLP

Without SpinOne

Millions

Security Issues

- High False Positive
- Manual Incident Response
- Long Deployment

With SpinOne

95% less

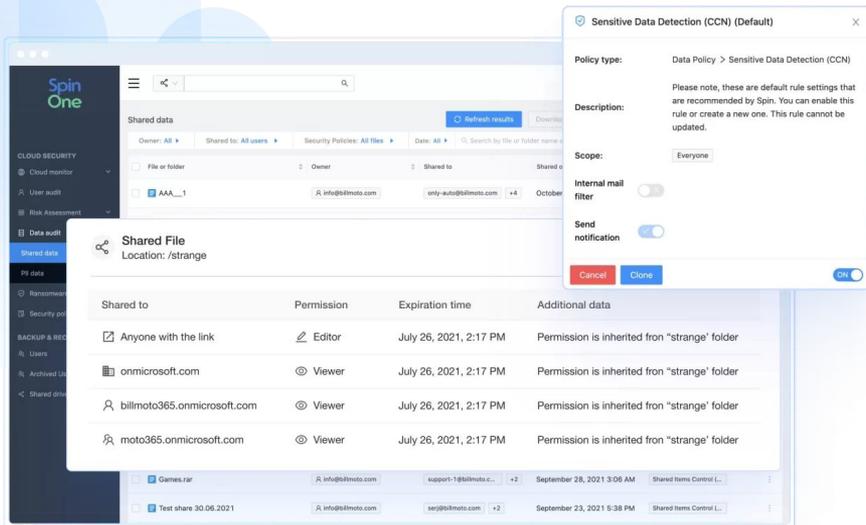

Security Issues

- Low False Positive
- Automated Incident Response
- Fast Deployment

Reduce Security Issues

Improve Compliance

SpinOne SaaS Data Leak Prevention & Data Loss Protection

- **Identify**
 - Data Shared inside/outside
 - Sensitive Information/PII Data
 - Abnormal Data Deletion
 - Abnormal Data Transfer
 - Abnormal Data Download
- **Automated 3x a day backup**
- **Accurate Disaster Recovery**
- **Fast Incident Response**
- **Policy Enforcement**
- **Data Retention**
- **Advanced Reporting**
- **Integration with 3rd-party: Splunk, ServiceNow, Jira, Slack, DataDog.**

Enterprise Security in place

SOC 2 Type II
Trust Services Principles

Member of CSA
No user passwords

GDPR/CCPA
EU Data Privacy Compliant
