

Revyz Command Center

Resilience & control for the Atlassian Cloud

ONE PLATFORM FOR ATLASSIAN CLOUD

Atlassian backups “are not used to revert customer-initiated destructive changes, such as fields overwritten using scripts, or deleted issues, projects, or sites.”

—Atlassian Trust Center (verified Aug 2026)

Recovering from customer-side data loss is up to you on every plan, so Revyz delivers the backup, configuration management, and governance that Atlassian Trash can't.

Available on

Atlassian Marketplace
Platinum Marketplace Partner

REVYZ KEY SOLUTIONS

Backup & Granular Restore

Full-fidelity automated backup with granular restore for Jira, JSM, Assets, Confluence, & Bitbucket

Configuration Manager (Sandbox to Prod)

Version, deploy, and roll back Atlassian configurations with no-code UX and full control

Configuration Drift Analyzer

Instantly detect config changes and compare against your desired state to simplify remediation

Audit Log Backup

Securely back up and retain Atlassian audit logs beyond native limits

Data Deletion Log

Maintain an immutable log of all deleted items for audit, security, and recovery

User License Insights

Identify inactive or underutilized users and optimize your license costs

Site Health & Optimization

Monitor metrics and receive actionable recommendations to keep your site peak-efficient.

Protect your Atlassian data from:

- DATA LOSS
- CONFIGURATION DRIFT
- ACCIDENTAL DELETION
- COMPLIANCE GAPS
- FAILED DEPLOYMENTS
- LIMITED AUDIT HISTORY
- SAAS VENDOR OUTAGES
- REGULATORY BLINDSPOTS

Configuration Drift & Dependencies

Auto-document setup and map dependencies to preview deployment impact.

Xray Config Drift & Analytics

Gain deep visibility into Xray configurations to ensure testing environments remain consistent.

Third-Party App Data Backup

Ensure total resilience by extending data protection to critical Atlassian Marketplace apps.

Data Cloning

Clone projects, spaces, and configurations into sandbox or test environments without touching production.

Export Data

Export Atlassian data into a human-readable format for total platform independence during cloud outages.

About Revyz

Revyz, a [Spin.AI](#) company, is the data resilience and governance platform for Atlassian Cloud, with backup, granular restore, and configuration management for Jira, Confluence, and Bitbucket. Revyz serves 500+ customers and more than 100,000 users in the Atlassian ecosystem and is backed by [Spin.AI](#), the SaaS security leader protecting 2,000+ organizations worldwide.

“

Revyz has done a fantastic job with meeting a need Jira admins have had for a long time.”

SW

Susan Waldrip
JSM Admin, University of New Mexico

“

Highly recommend Revyz. Secure, easy to use, and backed by a responsive support team – an incredibly valuable tool that brings peace of mind and operational efficiency.

NE

Nicole Eksteen
Digital Transformation Director, Avior Capital Markets

“

Really nice and helpful tool. They gave us a great demo of all the features and settings. I would definitely recommend the app.
