

# SpinSPM – SaaS Security Posture Management

Gain full visibility, incident response, and management for SaaS misconfigurations, access control, and connected third-party apps and browser extensions.

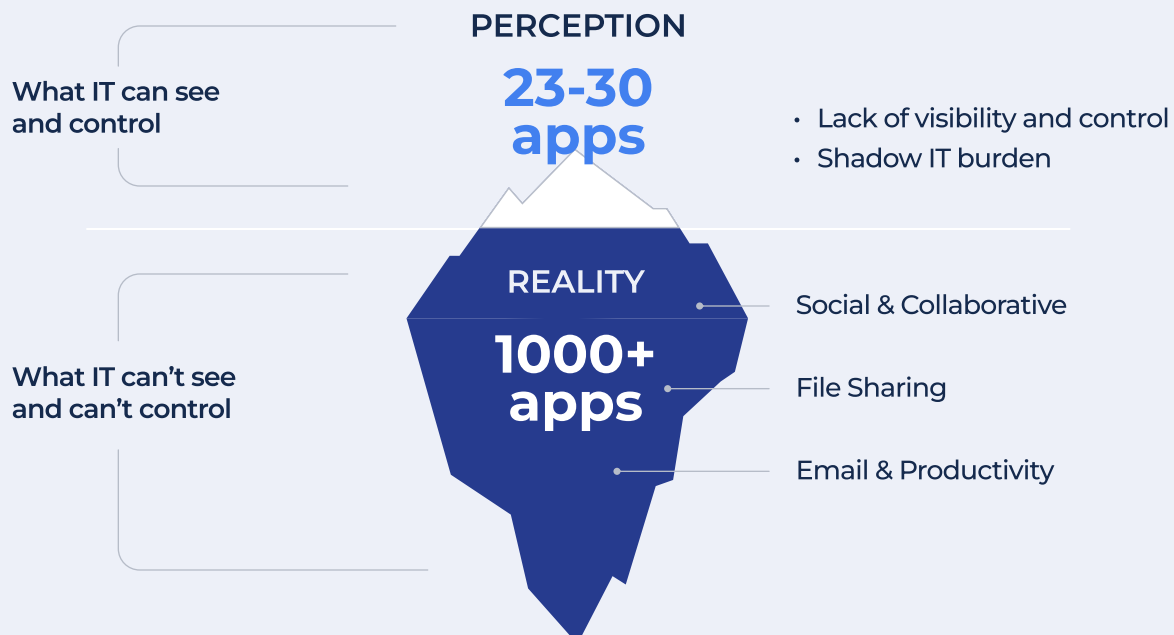

and more...

## SAAS SECURITY CHALLENGES

SaaS workspaces are mission critical for most modern organizations, housing essential data, collaboration projects, and operational infrastructure. This raises the stakes for potential SaaS breaches and ensuring security settings 43% of organizations have had at least one breach in the last 18 month due to SaaS security misconfigurations, making it the leading cause of SaaS-related breaches.

# 43%

of organizations have had at least one breach in the last 18 month

# KEY CAPABILITIES

SpinSPM helps you automatically discover, remediate, and manage mistakes in security settings, as well as third-party tools creating serious risk to your SaaS data. Reduce the risks of misconfigurations and third-party tools to save time, reduce security costs, and improve compliance.

## Misconfiguration Management

Identify and manage misconfigurations, security drifts, and compliance breaches within your SaaS applications through automated detection and response.

## Access Management

Allowlist or blocklist risky applications or browser extensions for everyone or specific organizational units to prevent unauthorized access to your mission-critical SaaS data.

## Third-Party Risk Management

Inventory and gain visibility into the cloud services, mobile apps, SaaS apps, and browser extensions that have access to your SaaS environment — including their permissions and who has access to these apps.

## Compliance Enforcement

Leverage granular security policies to control SaaS settings as well as third-party apps and extensions your users wish to install – with fast incident response and streamlined approvals.

## Ongoing Risk Assessment

Leverage 24/7 continuous monitoring and AI-based risk assessment, mapping to over 15 risk factors, to manage potential business, security, and compliance risks of each application and browser extension.

## Fast Incident Response

Get immediate, customizable notifications on detected incidents, misconfigurations, and risk score changes from a single dashboard that includes advanced reporting and integrations with Splunk, Crowdstrike, ServiceNow, Jira, and Slack.

## Provider Assurance: Integrated by Google

Our SSPM was selected by Google to be integrated into the Google Workspace Console to assess the risk of Chrome browser extensions.

## 400K+ OAuth & Extension Coverage

SpinSPM has assessed over 400,000 browser extensions & OAuth apps across 15 risk factors with its proprietary AI algorithms, standing as the industry's most comprehensive 3rd party risk database.

Security Operations Integrations:

# CUSTOMER SUCCESS STORIES

## One of the Largest Global Automobile Manufacturers Secures Digital Workspace with SpinOne

### The Challenge

- Lacked visibility into all SaaS services
- Vulnerable to 3rd party risk

### Requirements

- Detect & inventory all OAuth apps & browser extensions
- Automate continuous risk assessment
- Streamline approvals
- Agentless deployment

### The Solution

SpinOne was the only solution that provided an AI-based assessment with no agent required. Using our SSPM, they reduced risk assessment time for 50,000 third party apps and extensions from 2 years to 2 months, resulting in millions of dollars of ROI savings.

**92%** saved on risk assessment time

## Industry-Leading Content Delivery Platform Provider Protects Google Workspace Data

### The Challenge

- Little visibility into Google Workspace user activity
- No 3-party app or browser extension visibility & control
- Struggled to mitigate risks of data leaks and shadow IT.

### Requirements

- Mitigate insider risks to SaaS data
- Discover, assess risk, & manage 3rd party apps & extensions
- Manage SaaS access & permissions across people & tools
- Streamline approvals
- Block risky apps & extensions
- Prevent data leaks with DLP
- Reduce vendor management burdens
- Agentless deployment

### The Solution

Using SpinOne, the organization now has full visibility and management of SaaS misconfiguration management, 3rd party risk management, data sharing, & user behavior tracking in Google Workspace with automated compliance enforcement, streamlined approvals, and risk-based policies – *all in a single pane of glass.*
