

SpinCRX

Browser Security Platform

COMPREHENSIVE PROTECTION FOR EVERY BROWSER, ACROSS ALL USERS AND DEVICES

SpinCRX gives security teams full visibility and control over browser extension risk and unapproved browser activity — assessing, monitoring, and managing extensions, and flagging and shutting down unapproved activity — for users and devices across Chrome, Edge, Safari, and Firefox.

- Detect & shut down shadow IT & shadow AI extensions across every browser
- Cut manual browser extension review time with automated risk assessments
- Identify and remediate high risk & malicious browser extensions
- Prevent sensitive data leaks across browser activity
- Enforce granular and customizable security policies
- Close compliance gaps with continuous, audit-ready visibility

SPINCRX KEY FEATURES

Real-Time Risk Assessment

Continuous, automated detection and assessment of browser extensions, including version updates and marketplace listing changes

Risk Management

Automatically block suspicious or malicious browser extensions and domains in seconds, not days

Data Leak Prevention

Detect sensitive data shared via email, LLM prompts (Claude, ChatGPT, Gemini, etc.), or uploads to unapproved cloud storage (Dropbox, Box, etc.)

Cross-Browser, Flexible Deployment

Full coverage across Chrome, Edge, Safari, and Firefox, deployable at the user or device level to fit any environment

Web Threat Protection

Protect users in real time from today's fastest-growing browser threats, including phishing sites, drive-by downloads, and malware downloads

Trusted by

Defend your browser environment from the risks of:

MALICIOUS & UNSANCTIONED EXTENSIONS

SHADOW IT & SHADOW AI

PHISHING WEBSITES & ACCOUNT TAKEOVER

DATA LEAKS

MALWARE DOWNLOADS

MALICIOUS & RISKY DOMAINS

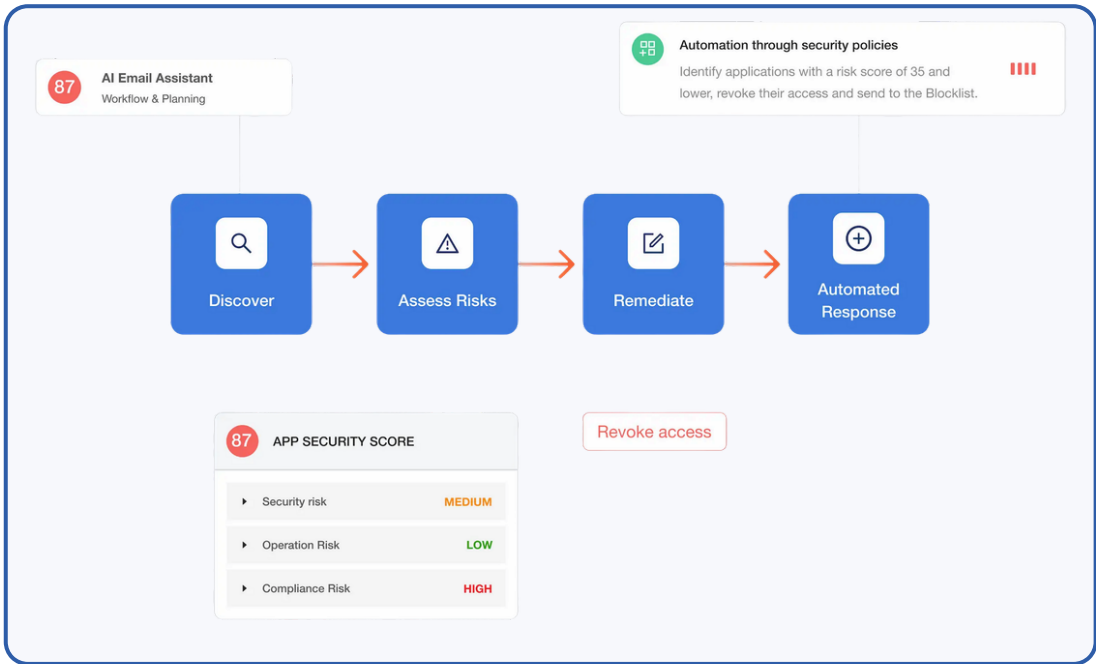

NON-COMPLIANCE

WHY DO YOU NEED BROWSER-LEVEL DLP?

VISIBILITY: Network security solutions can't see what's happening inside the browser. Because SpinCRX operates at the browser level, it sees risks and threats that live in the browser, including browser extensions and sensitive data being uploaded, typed, or pasted on any site.

EASIER SETUP: Unlike network security solutions, SpinCRX doesn't require complex setup — no port numbers, IP allowlists, or routing rules required. Deploy quickly and start protecting data right away.

SPINCRX INCIDENT RESPONSE WORKFLOW

BY THE NUMBERS

550K+

Apps & extensions risk-assessed

00:00:03

What takes your team 30 minutes per app takes just **3 seconds**.

Spin.AI solutions are trusted by 2000+ organizations in 100 countries

ABOUT SPIN.AI

Spin.AI is an innovative provider of SaaS and browser security solutions for mission-critical applications, including Microsoft 365, Google Workspace, Atlassian, Salesforce, and Slack. Our SpinCRX platform extends that protection to the browser — defending against malicious extensions, risky domains, shadow IT/AI, and data leaks across every profile and device — helping you mitigate risk, save time, and improve compliance.

“

Spin.AI Risk Assessment is used to assess the risks of browser extensions and minimize the risks associated with them.
